Green City Clean Waters MPACT

Existing research shows that access to parks and green spaces for recreation reduces chronic disease and stress rates, and improves mental health and function.

BEING SAFE

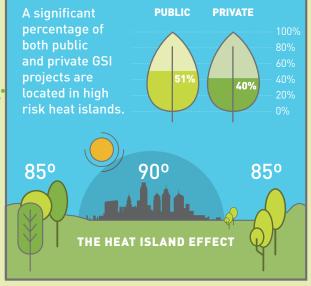

GSI PROJECTS reduce crime within 1/4 mile of site by 10%

COSTS AVOIDED:

\$337M

KEEPING COOL

GSI projects reduce surface temperatures and mitigate urban heat islands that elevate air pollution and greenhouse gases, and increase energy consumption.

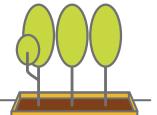

REIMAGINING STORMWATER

Green City, Clean Waters is Philadelphia's 25-year stormwater management program that primarily uses green stormwater infrastructure to manage combined sewer overflows. The vision of Green City, Clean Waters is "to unite the City of Philadelphia with its water environment, creating a green legacy for future generations while incorporating a balance between ecology, economics, and equity."*

WHAT IS GSI?

GSI (Green Stormwater Infratructure) consists of soil-water-plant systems that intercept stormwater through ground infiltration and evaporation.

Forms include:

TREE TRENCHES

RAIN GARDENS

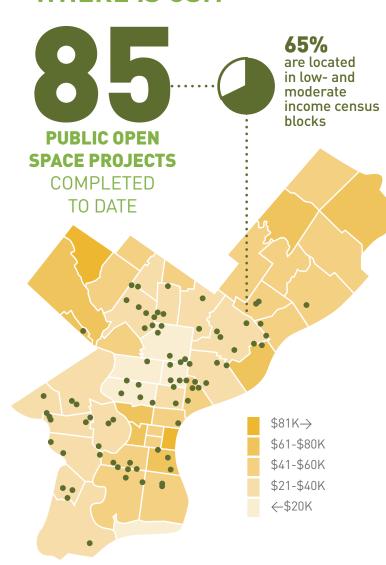

GREEN ROOFS

PLANTERS

WHERE IS GSI?
